

Fast facts about LiuGong Machinery...Did you know?

- LiuGong ranks as the 20th largest construction equipment manufacturer in the world. In 2013, LiuGong had US\$2 billion in sales revenue, selling more than 43,000 total units.
- The company is a leader in the design and production of wheel loaders. In 2013, LiuGong held nearly 12.4% of the global market share in wheel loaders and nearly 18.4% share domestically.
- It is a company of many firsts, including being the first company in China to begin manufacturing heavy equipment and the producer of China's first modernized wheel loader in 1966. LiuGong has been integral in China's modernization and infrastructure development. In 1987 LiuGong introduced Caterpillar technology.
- LiuGong has a total of 24 manufacturing facilities worldwide. The company employs more than 12,000 people, including more than 1,000 engineers working in three world-class research and development facilities. In 2013, LiuGong invested more than US\$ 85 million into its R&D program.
- LiuGong group now has 16 product lines including wheel loaders, excavators, bulldozers, motor graders, pavers, cold planers, skid steers, backhoe loaders, rollers, forklifts, truck mounted cranes, crawler cranes, pipe layers, mining dump trucks, dynamic compaction machines and concrete equipment.
- The company supports its global product lines with a rapidly growing network of more than 320 dealers across six continents in over 130 countries. The LiuGong dealer network provides over 2,650 sales outlets around the world.
- Supporting the dealer network are 9 regional offices with engineering, marketing and service support, coupled with 7 overseas parts depots located strategically throughout the world which ensure rapid replacement of parts and servicing of equipment. LiuGong does not enter a market without dealers and support systems in place.
- Regional offices are currently located in Africa, Brazil, United Arab Emirates, The Netherlands, India, Poland, Singapore, Russia and the U.S. Further regional offices are continuously added as LiuGong grows.
- LiuGong places intense emphasis on quality, which is demonstrated by a commitment to Six Sigma methodology and compliance with ISO 9000 standards. As a result, after a rigorous review, LiuGong was awarded China's National Quality Award.
- According to Off Highway Research, LiuGong is renowned for being one of very few Asian competitors producing equipment that exceeds international standards, and the firm's designs and prices are often benchmarked by other domestic manufacturers.
