

Social Responsibility

“As a global corporate citizen, LiuGong shares its responsibility to act in the global public interest and to honor people and the planet. With the launch of our new re-manufacturing facility, we will recycle construction machines and parts in order to continue "developing an economy focused on recycling and an environmentally responsible society". Our early commitment to Tier IV emissions development and perfection is another indication of LiuGong's official commitment to the world environment.

LiuGong and its dealers throughout the world increasingly take responsibility for the human condition as well. Disaster relief is just one example. All over the world, after devastating natural disasters, LiuGong partners with local dealers and governments to donate both equipment and manpower to help aid in clean-up and recovery. LiuGong has always proclaimed that people come first. Now, our growing commitment to social responsibility on a global scale is just another way we uphold our mission”.
