Electric Seated

Operator type Load capacity

1600 / 2000kg

CLG2R016/20-SM/N REACH TRUCK

SAFE AND RELIABLE

THE TILTING OF THE FORK

The tilting of the fork can effectively improve the stability of the whole vehicle and the loading capacity at height.

THE ELECTRO-HYDRAULIC PROPORTIONAL CONTROL SYSTEM

The electro-hydraulic proportional control system has good fretting performance, more stable work and more precise control.

SPEED LIMIT FUNCTION

Speed limit function, when the forklift lifts to a certain height, the driving speed of the forklift will automatically decrease to ensure the safety of high position operation.

THE HEIGHT LIMIT FUNCTION

The height limit function, the lifting motor will automatically power off to ensure the safety of lifting when the forks lift to the maximum height.

TURNING SPEED LIMIT CONTROL

Turning speed limit control prevents the truck from tipping sideways when turning, ensuring the safety of the truck when turning.

SMOOTH DECELERATION

Smooth deceleration when the mast reaches/ backwards to the end canensure the stability of the mast movement.

MOTOR TEMPERATURE DETECTION AND CONTROL FUNCTION

The motor temperature detection and control can effectively prevent the motor from being damaged due to excessive temperature.

The motor current detection and control can effectively prevent the motor from being damaged due to excessive current.

RELIABLE BRAKING

The combination of electromagnetic brake and hydraulic brake has a short braking distance, no deviation, no impact, and is safe and reliable.

ONE-KEY START OPERATION FUNCTION

The parking electromagnetic brake can realize the one-key start operation function no matter it is on the slope or on the smooth ground.

CAN BUS

Using CAN bus communication technology, electrical wiring is simple, the compatibility is good, and the reliability is high.

AC FREQUENCY CONVERSION SPEED CONTROL TECHNOLOGY

AC frequency conversion speed control technology enables stepless closed-loop speed control of driving, lifting, and steering drives, which is accurate and reliable.

ROBUST DESIGN & EXCELLENTS TABLITY

EXCELLENT STABILITY

The powerful chassis structure and reasonable center of mass distribution make the forklift have excellent stability.

MASTS FORWARD MORE STABLE.

The high-precision forward sliding rail and excellent clearance compensation design make the forward movement of the masts

GOOD VISION

The reasonable layout of the lifting cylinder and pipeline system, the mast pipeline is simple and beautiful, and the vision is

COMFORTABLE DRIVING AND EASY OPERATION

LOW-NOISE

Low-noise gear hydraulic pump reduces the lifting noise of the whole vehicle. Travel motor controllers, hydraulic pump motor controllers and steering motor controllers of international well-known brands are selfprotected, maintenance-free, and have superior performance.

DRIVING SPACE

The spacious driving space and ergonomic layout reflect the humanized design of the

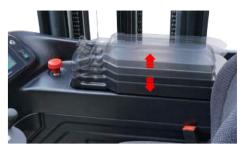

SHOCK-ABSORBING SEAT

Shock-absorbing seat, adjustable backrest, and seat belt as standard.

BEST OPERATING EXPENIENCN

The steering wheel and central control console can be adjusted freely in all directions to suit your best operating habits.

FINGERTIP OPERATION

Centralized control console, fingertip operation, convenient and accurate.

LCD INSTRUMENT

Multi-function color LCD instrument can display information suc h as steering wheel position, battery power, power alarm, fault code, running time, driving speed etc. The driving speeds of low, medium and high third gear can be set through the meter.

180 °/ 360 ° STEERING

Adopting AC EPS electronic power steering system, the steering is light and

has automatic centering function, and

the 180 °/ 360 °steering mode can be

switched in real time.

In order to replace the battery its tray should be reached forw ards. The mechanism for battery's tray release is located near with operator's foot.
